Subject: Thermylene® Compound Shelf Life

To Whom It May Concern,

This letter is in response to your request for information concerning the shelf life of Asahi Kasei Plastics North America (APNA) Thermylene® polypropylene compounds. Shelf-life data is not available for APNA Thermylene® polypropylene compounds.

Under normal conditions of storage for 2 years before usage, measurable mechanical and visual property degradation is not anticipated. However, it is strongly recommended that part performance testing of molded parts for usage suitability be considered, especially in the event of product exposure to extended storage times and/or to extremes in storage conditions.

Determination of the suitability or fitness of Thermylene® compounds for any application is the sole responsibility of the purchaser. APNA specifically disclaims any warranty of merchantability or fitness for a particular purpose.

Please contact me if you have any further questions.

Respectfully,

Rita Vickerman
